

MACHINEDRUM SOUND PACK

O3: INDIE TWIST

You may use the content of this Sound Pack on a 100% royalty-free basis in your original music compositions (which include, but is not limited to, soundtracks of such as films, video productions, radio/TV programs or commercials, computer games and multimedia presentations, library music). You may broadcast and/or distribute your own music compositions or audio projects that were created using the content of the Sound Pack. However, the content of the Sound Pack may not be commercially or otherwise distributed on a standalone basis, hosted and used in non Elektron devices, nor may it be repackaged in whole or in part as audio samples, sound effects or music beds.

SOUND PACK CONTENT

- 5 Snapshots each containing 1 song and 4 patterns
- 5 Sample banks
- 99 ROM samples

Some Sample banks may contain loops adjusted to a specific BPM. To hear the demo patterns as they were intended we recommend switching to the Machinedrum SONG mode before listening to them.

RECOMMENDED REQUIREMENTS FOR THE SOUND PACK

This Sound Pack is specifically made for +Drive equipped MKII models of the Machinedrum UW. Some Sample banks may need more sample memory than MKI units support and all patterns consist of 64 steps. We strongly recommend you have Machinedrum OS 1.62 or higher installed before transferring the Sound Pack content to the Machinedrum. To make the transfer process as smooth as possible, C6 v 1.4 or higher should be used.

TRANSFERRING THE SOUND PACK CONTENT TO YOUR MACHINEDRUM

Download and install the free program C6. It is found in the Support and Downloads section of the Elektron website. Connect the computer you are sending the files from to your Machinedrum by using a MIDI interface. We recommend using our TM-1 USB MIDI interface. Open the Configure menu in C6 and make sure the ports of the MIDI interface are activated.

DETAILED TRANSFER INSTRUCTIONS

1. After extracting the content of the Sound Pack zip-file, open the Snapshot/Sample bank folder you want to transfer.
2. Locate the .c6 file. Drag and drop it to the C6 window. All sample and data syx files of the folder will be added to the C6 list. At the top of the list the song/pattern/kit syx file will be placed.
3. Open up the Machinedrum GLOBAL menu by pressing [FUNCTION] + [PATTERN/SONG]. Choose any slot and press [ENTER/YES].
4. Open the FILE → SNAPSHOTS menu. Select an empty Snapshot assigned to an empty Sample bank. As no Snapshot names will be automatically assigned during the data transfer we recommend you to rename the Snapshot, preferably to the same name as the folder containing the Snapshot/Sample bank. This goes for the Sample bank as well.
5. Exit the SNAPSHOTS menu and enter the SAMPLE MGR. Select RECV and the ORG method of receipt. Press [ENTER/YES]. The Machinedrum will now wait for the samples to be sent. Note that the sample syx files contain position markers. If you want to place the samples in other positions, do not use the ORG method. This, however, is not recommended.

WE ARE ELEKTRON, WE MAKE MAGICAL MUSIC INSTRUMENTS

Elektron Music Machines, Sockerbruket 9, 414 51, Gothenburg, Sweden

Phone: +46 31 743 744 0 • Fax: +46 31 743 744 9 • SALES@ELEKTRON.SE • WWW.ELEKTRON.SE

6. In C6, select all syx files except the first one containing the song/pattern/kit data. The easiest way to do this is to select the second to first file in the list, then press the shift key on your computer keyboard while clicking on the last SYX file. If you are using a TM-1 interface, active the Turbo Mode. Press the Send button in C6. Exit the SAMPLE MGR once the sample transfer is complete.
7. Open FILE → SYSEX REC. Select the ORG option and press [ENTER/YES]. The Machinedrum will now wait for the song/pattern/kit data to be sent.
8. In C6, select the first file in the list. Press the Send button.
9. After the transfer is complete, enter the FILE → SNAPSHOTS menu and save the Snapshot.
10. Repeat steps 1 to 9 for the rest of the Sound Pack folders.

SIMPLIFIED TRANSFER INSTRUCTIONS

1. After extracting the content of the Sound Pack zip-file, open the Snapshot/Sample bank folder you want to transfer.
2. Locate the .c6 file. Drag and drop it to the C6 window. All sample and data SYX files of the folder will be added to the C6 list.
3. Open the SNAPSHOT QUICK MODE menu by long pressing [FUNCTION] + [PATTERN/SONG]. Select an empty Snapshot assigned to an empty Sample bank. Exit the menu.
4. In C6, select all SYX files. The easiest way to do this is to select first file in the list, then press the shift key on your computer keyboard while clicking on the last file. If you are using a TM-1 interface, active the Turbo Mode. Press the Send button in C6.
5. After the transfer is complete, enter the GLOBAL → FILE → SNAPSHOTS menu and save the Snapshot. As no Snapshot names will be automatically assigned during the data transfer we recommend you to rename the Snapshot, preferably to the same name as the folder containing the Snapshot/Sample bank. This goes for the Sample bank as well.
6. Repeat steps 1 to 5 for the rest of the Sound Pack folders.

CREDITS

Samples recorded by Filip Leyman.

Editing and programming by Daniel Troberg and Filip Leyman.
